DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-24 are allowed.
2. Examiner's Statement of Reasons for Allowance:

The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 1-3, 5-21, the closest prior arts, Mazzara (20030087642) teaches in a mobile station including a preferred roaming list, a method for an efficient selection system for registration/acquisition of wireless communications systems that avoids time consuming acquisition of a signal that takes up to about 20 seconds, comprising: maintaining a list of unusable wireless communications systems, each entry of a wireless communication system in the list of unusable wireless communications systems including a system identifier and corresponding avoidance criterion for not using the wireless communication system, wherein at least one of said unusable wireless communications systems is included on the preferred roaming list; selecting a wireless communications system from the preferred roaming list of wireless communication system in accordance with a predetermined system acquisition sequence, each entry of a wireless communication system in the preferred roaming list including system identifier; determining whether the selected wireless communication system from the preferred roaming list is a useable wireless communication system or an unusable wireless communication system; attempting to acquire and register with the selected wireless communications system when the selected wireless communication system is determined to be a useable wireless communication system; repeating the

step of selecting when the selected communication system is determined to be an unusable wireless communication system; wherein the selected wireless communications system is determined to be an unusable wireless communication system when a system identifier for the selected wireless communication matches a system identifier in the list of unusable wireless communications systems and when avoidance criterion corresponding to the system identifier in the list of unusable wireless communication system is satisfied. Bamburak et al (6195532) teaches repeating the step of selecting, before attempting to acquire and register with the selected wireless communications system. Bamburak et al further teaches that provider location method involves storing a frequency band search schedule which has several bands in a predetermined order. Information is stored on several categories of service provider. The frequency bands are examined until a frequency band with an acceptable service provider is located by examining the bands in the order specified. A category of service provider is identified for the acceptable service provider. Information such as service operator codes broadcast on a frequency band control channel is compared with the stored information on the service provider categories. Narasimha et al (20020187804) teaches wireless system tries to acquire CDMA system for a particular period of wait time for a wireless terminal 130. During this time period, the system does not use any wireless communication system the wait time starts from the current time. Thus, it is clear that the claimed "avoidance criterion" is equal to the current time the terminal's system makes an attempt plus the waiting. Claims 1-3, 5-21 are allowable over the prior art of record since the cited references taken individually or in combination and

Remarks (10-12-09 and 08-10-2010) fails to teach maintaining a list of unusable wireless communications systems, each entry of a wireless communications system in the list of unusable wireless communications systems including a system identifier and corresponding avoidance criterion that is equal to a current time plus an avoidance duration time from a look-up table that includes an entry for each of a plurality of communications failures and corresponding avoidance durations for not using the wireless communications system, wherein at least one of said unusable wireless communications systems is included on the preferred roaming list.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance."
